

Electro-Voice SR785LN/O Dynamic Gooseneck Paging Microphone (normally open)

A low-impedance gooseneck microphone for single zone paging. Designed for applications where ruggedness, dependability and durability are the main requirements. Microphone housing is constructed of die-cast zinc alloy to stand up to the toughest abuse and conditions. Features a recessed aluminum grille with a windscreen and durable satin-chrome finish.

Features

- Heavy duty, three-hole mounting flange
- Extra-strength 16" steel-tubing flex arm
- SR785LN/O includes a push button switch with normally "open" switching
