

Electro-Voice MB300 Horizontal Array Kit for Side-by-Side Arraying of (2) Speakers (Black)

The Mb300 horizontal array kit contains two brackets and eight of each of the following: 5/16-18 x 1 hex-head bolts. 5/16 lock washers. 15/18 nuts. Chart 1 (below) details part descriptions. quantity and part numbers.

The Mb300 is used in conjunction with the Mb200 installation bracket to create a speaker array. Selection of the required number of each kit is shown in Chart 2 (below).

The array can be constructed in either of two angular configurations:

1. Speakers side by side (50° angle) for a tight array.
2. Speakers spread slightly (60° angle) for wider coverage. Note that a full 360° array can only be accomplished with the 60° angle pattern.

Suspension of the speaker array is made easy with the four 12.7-mm (0.5-in.) holes located on the Mb300. A cable, chain quick link, or other suitable hardware which is rated for overhead lifting (not supplied with this kit) can be used to connect to the array for flying.

Features:

- Array kit for System™ 200 speakers
- Creates arrays of two to six speakers when used with the Mb200 installation bracket
- Two mounting angles: 50° and 60°
- Provides a rigid frame for arraying speakers from one to two levels
- Color: Black
