

Electro-Voice RE410 Condenser Cardioid Handheld Vocal Microphone (Frequency Response 50Hz to 20kHz)

The Electro-Voice® RE410 is a professional quality handheld condenser microphone that was designed specifically for vocalists, yet has the versatility, smooth response, and dynamic range to make it outstanding for virtually any application. The RE410 is the ideal vocal microphone for anyone that appreciates the crisp high end and warm proximity effect that can only come from a top performing condenser microphone. The response of the RE410 is tailored to provide just a slight amount of “air” in the 5 to 10kHz area, enhancing the sound without adding stridency. The RE410 features a cardioid polar pattern that provides great rear rejection and a smooth off-axis response that's perfect for performers who tend to “wander” around the mic.

Features:

- Versatile Condenser Microphone, Ideal for Both Vocals and Instruments
- Cardioid Polar Pattern with Excellent Feedback Rejection and Acoustic Isolation
- Multistage Pop Filter Eliminates Breath Pop Noises
- Memraflex™ Hardened Grille Screen
- Warm-Grip™ Handle for More Comfortable Feel
