

Electro-Voice CFID32T 32-Watt Variable Power Paging and Talkback Horn with 25V/70.7V Transformer

The Electro-Voice CFID32T is a 32-watt paging horn with a 1.5" voice-coil, and a 25V/70.7V matching line transformer, designed for paging installations requiring reliable speech intelligibility under adverse ambient conditions. The CFID32T casing is finished in a weather-resistant gray, and offers a diffraction effect for a wide horizontal dispersion. The unit is equipped with an integral swivel bracket, and a weather-sealed gland-nut connection.

Features:

- 32-watt paging and talkback installation horn with 25V/70.7V transformer
- Integral multi-position Uni-lock swivel mount
- Power taps include 1.25W, 2.5W, 5W, 10W, 15W and 32W for both 25V and 70.7V lines
- Indoor/outdoor capable with water-tight gland nut seal
