

Electro-Voice PCBOUNDARY Dual Condensator Multi-Pattern Boundary Layer Microphone/50-20000Hz

The PC Boundary is a very low-profile area microphone that can be used on any surface and with virtually any mic mixer. Featuring multiple on-board polar patterns—three directional and one omni—the PC Boundary is ideal for any installation where premium-grade area coverage is required.

Features

- Easy switching between omni, cardioid, supercardioid, or figure “8” polar patterns
- Versatility for different acoustic environments
- Consistent microphone voicing across all four patterns
- Easy-to-use mute switch, programmable for either latching on/off or momentary operation
