

Electro-Voice EVM12L8OHMCLASSIC 12-inch/200-Watt/8 Ohms Premium Guitar Speaker

The EVM12L loudspeaker is a 12-inch speaker designed for professional, high-level, high-quality guitar amplification systems. Used full range, the EVM12L loudspeaker's frequency response is specifically tailored for brilliant lead guitar performance and classic guitar tones. The EVM12L loudspeaker incorporates manufacturing refinements that have improved performance. Power capacity is 200 watts per EIA RS-426-A 1980. The Power-Handling section describes these ratings in detail. This improvement in the EVM12L loudspeaker's already highly regarded reliability has been made without changing its other performance characteristics in any way.

The construction of the EVM12L loudspeaker features a low-mass edgewound voice coil on a rugged laminated polyimide coil form, driven by our large, 16-lb magnetic structure. Also featured are a heavy-duty curvilinear cone and a fatigue resistant cone suspension. Both the coil and magnetic structure are vented. All of this is packaged around a robust, eight-spoke, die cast aluminum frame. The EVM12L loudspeaker may be front- or rearmounted without an adapter.

Features:

- Classic lead guitar performance—full, precise overdriven tones and unrivaled clean tones
- Ideal upgrade speaker
- 200 watts long-term power capacity
- Edge-wound flat aluminum wire for maximum output and bullet proof reliability
- 100 dB sensitivity
