**The AC-EX40-444 is a revolutionary 4K60 4:4:4, HDR and 18Gbps supported HDBaseT extender over single CAT-5e/6a/7 UTP/STP.**

AVProConnect presents its first 18Gbps over copper extender. Using ICT (Invisible Compression Technology) we have achieved what was thought to be impossible. We can deliver a virtually lossless high bandwidth 4K HDR signal with support for all signals up to 18Gbps. Deep Color and HDR Metadata remain intact making the transmission free of artifacts like banding. Other similar devices will deliver a sub-par image that has very visible banding and color shifting.
