

## SWIT PB-M98S 98Wh Pocket V-mount Battery Pack

The brick size V-mount batteries are always too big and heavy for field shootings, especially the handheld stabilizers, focus puller monitor, portable LED panel, or small cameras.

PB-M98S Pocket V-mount battery is designed for the above applications! It's only a DV battery size, with high capacity cells and still reaches 98Wh, and without any compromise on the DC sockets!

### 98Wh Fly Friendly

Max 100W/8A constant load

PB-M98S consists of 12pcs of high class 18650 battery cells, nominal voltage is 14.4V and reaches 98Wh / 6.6Ah high capacity. You can take this battery in carry-on luggage to board airplane.

The Max constant load is 100W, 8A.

### Built-in D-tap and USB

The pocket size PB-M98S still has D-tap and USB sockets built-in.

The D-tap socket share 100W/8A load DC output with the V-mount pins, and support charging input by SWIT PC-U130B2 dual D-tap charger.

The USB socket outputs 5V/2A for smart phone fast charging.

### 5-LED Power Indicator

Low battery warning

PB-M98S has 5-LEDs to indicator remaining power percentage. When remaining power is less than 10%, the last LED will flash automatically to remind changing battery.

### 3A Fast Charging

PB-M98S can be charged by all standard V-mount chargers and D-tap chargers. The max charging current is 3A.

The following chargers are recommended:

1. S-3822S, Portable 2-ch Simultaneous Charger

Charge 2x PB-M98S: Approx. 3 hours

2. PC-U130B2, Ultra-Portable Dual D-tap head charger

Charge 1x PB-M98S: Approx. 3 hours

Charge 2x PB-M98S: Approx. 5 hours and 15 minutes

### Features

- 98Wh/6.8Ah fly-friendly capacity
- Max 100W/8A constant load
- 1x D-tap output & charging input
- 1x USB 5V/2A output
- 5-step LED power indicator
- Power info for both SONY & RED
- Wire-Free internal technic
- Multiple circuit protections
