

BZB 45-0017-LA DataComm Split Plate Plates with Flexible Opening/Lite Almond

The patented DataComm Split Plate with Flexible Opening to install low voltage cables behind your HDTV, amplifier or other audio video devices. With the split design, this Cable Plate can be installed around existing low voltage cables run through the wall, eliminating the need to re-pull wires keeping the opening in the wall covered. The Flexible Split Plate holds up to 6 cables and mounts to any standard 1-gang low voltage mounting bracket.

Features

- Color: Lite Almond
