

BZB 45-0021-WH DataComm Recessed Low Voltage Cable Plate with Recessed Power/White

The patented DataComm Recessed Low Voltage Cable Plate with Recessed Power is used to install low voltage cables and power behind your flat panel TV, your amplifier or other audio video devices. The wall plate can be installed facing up or down.

Features

- Use with either a single gang new work box or old work box
- Grounded 15 Amp recessed receptacle allows you to install power behind your HDTV
- Mounting wings are molded into the plate and fasten tightly against the back of the drywall; the wings are designed for use in walls up to 1" thick
- Color: White
