

ICRealtime NVR-8128K-DR-8TB 128CH Embedded 4K NVR/Enhanced H.264 Supports up to 12MP/8TB HDD

This listing is for NVR-8128K-DR-8TB Network Video Recorder (8TB HDD) only. Use description below as a general reference.

Our top-of-the-line recorder offers massive storage and processing power. It's capable of recording up to 128 channels of high definition video. Best of all, you will be recording and displaying surveillance footage of up to 4K resolution. The built-in video analytics make this a powerful unit ideal for large-scale projects that require smart surveillance

The device supports: tripwire, intrusion, scene change, and object abandon. In addition, the system supports audio baseline detection, so if the audio in a room goes from normal to violent, the system can take a snapshot, send an email, or set off an annunciator or alarm device.

The NVR has redundant 120V power supplies, 4 gigabit Ethernet cards, and up to 16 hard drives with a total built in storage capacity of 96TB. With an Intel i7 processor and 8 gigabytes of RAM, this NVR is built for the toughest jobs.
