ASP-100 is a device for receiving stream broadcasting through network. You can play BGM without limitation of capacity or space, because you can play the sound source transmitted in real time without downloading or saving the sound source. In addition, web page GUI allows users to easily control streaming channels and volumes, and the system can be easily set up as well.

Features:

- Streaming channel select, playback/stop, volume control via webpage
- Security control(password/log setting) via webpage
- System check schedule setting and system restoration via webpage
- Broadcast/Network status check via LED (Power/Network/On Air/Operation/DHCP)
- Selectable Dynamic IP (DHCP) and Static IP (STATIC)
- Keep accurate time by synchronizing time with Internet
- Continuous streaming playback via redundancy setting and buffering management
- RCA audio output terminal
- Factory reset button (Restoration)can be easily set up as well.
