

Wall-Smart 10-01-526 Secured Accessible In-Wall Mount for Ipad Mini 4 with Hidden Lock

The Wall-Smart for iPad mini 4 is an adapter for in-wall use of an iPad mini 4 as a control device for Smart home/office/public institutes. The Wall-Smart for iPad mini 4 securely mounts the iPad® mini 4 while allowing easy access, insertion and removal.

Features

- Flush with the wall.
- iPad mini 4 mounted horizontally (landscape position).
- The iPad mini 4 home button remains accessible.
- Paintable with the wall paint in any color and texture.
- Easy to operate. Electrically locked/unlocked by positioning of the Wall-Smart key over top right door corner (Wall-Smart key included). After unlocking, door manually opened to insert/remove iPad.
- Standard colors of internal surfaces:
 - back wall and back lid: black;
 - internal surfaces of iPad mini holding tray: white (custom colors available upon request)
 - External surfaces (front panel) are unpainted. To be painted after installation as part of the wall. The adapter is supplied with a paint masking plug.
- iPad mini 4 power supply via standard iPad power cord connected to an external power source through the adapter back lid. (power supply and cord are not included)
- Electric lock power supply (12VDC, 0.28A) via power cord attached, (power supply not included)
- Designed to be installed in 1/2" drywall. Installation of the Wall-Smart adapter is straight-forward. Installation process is similar to drywall construction procedures.
- For installation in concrete/block wall use "WS Concrete Box 406x340" P/N 10-01-013 (sold separately)
