

Current Audio AX-KPE Fixed Keypad Controller with IR Pass Through

This listing is for AX-KPE only. Use description below as a general reference.

The KPE requires no programming, instead it adopts the zone it controls from the amplifier controller port it is connected to. Source control can be achieved using the original manufacturers remote and the IR receiver/target on the front of the keypad. As the KPE is powered directly by the controller ports it needs no additional power supply. Slim and discrete styling with tactile buttons and screwless decora cover plates.

Features:

- Plug and Play Versatility
- Operating voltage - 12VDC
- No Programming required - Automatically adopts the zone assigned to the keypad port on the amplifier for ultimate connection and ease
- Compatible with all current Axium amplifier keypad ports
- IR pass through for source control using original manufacturers remote control
- Connection: RJ45 plug
