

Datavideo GO-1REPLAY STUDIO Complete Replay Kit with Rolling Case

If you are looking to add instant replay to your school sports productions, look no further than the brand-new GO-1Replay Studio Kit from Datavideo.

It is a one channel instant replay kit that comes with a user-friendly controller and dual monitors for previewing the highlights before playing. The kit includes: HDR-10 single channel instant replay unit, RMC-400 controller, and TLM-102 10" dual LCD monitor all connected in a rack that fits inside a portable case with wheels.

Workflow

In addition to the replay kit, we created an entire workflow for your school sports productions. Everything from cameras, to switcher, to instant replay, to streaming, recording, and sending the program feed to a video scoreboard for fans in the audience.
