

Datavideo HS-1600T 4-Channel HD/SD HDBaseT Portable Video Streaming Studio

Made for mobility. Made for the web.

The HS-1600T brings a new level of simplicity to production workflows. You'll set up faster and easier thanks to its portable "briefcase" design and HDBaseT Technology. And thanks to its built-in H.264 web streaming encoder, you can stream your show to virtually any CDN like YouTube and Facebook in no time.

Variety of video and audio input/output

4 video inputs (RJ-45 x 3 + HDMI x 1) and 3 video outputs (HDMI x 3)
Audio inputs: XLR Analogue x 2 + RCA Analogue (L/R) x 2

Made with HDBaseT Technology

Camera connections typically require one cable for video, a second cable for power, and a third one for control. However, the HS-1600T is able to do all of the above using only one ethernet cable for each camera. This increase in flexibility greatly reduces setup time, and now you can mount the camera in challenging locations (like spots without nearby power outlets)

Built-in H.264 recorder for SD cards

The HS-1600T comes with a built-in web-ready recorder. Simply insert your SD card, and you'll have video files that can be immediately uploaded to the video network of your choice or to your website.

Stream to Facebook Live, YouTube, Twitch, and more

With the built-in H.264 streaming encoder, you can stream your show to virtually any CDN including Facebook, YouTube or Twitch in no time.

Built-in camera control.

The HS-1600T's next generation design saves you time, money, and table space with its built-in camera control interface for up to 3 Datavideo PTZ cameras. (Works with PTC-140T and PTC-150TL)

17.3" LED Backlit Monitor

Built-in Monitor Display. 17.3" HD TFT LED backlit monitor with resolution 1920x1080 pix.
