Datavideo TLM-102 Dual 10 inch Monitor

The TLM-102, Dual 10.1" 4RU Rack mount monitor, is a broadcast quality monitoring system with built-in vectorscope/waveform monitor and video signal converters. Each monitor has one SDI input and one HDMI input. Each monitor also has one SDI output and one HDMI output. Built-in signal conversion allows each monitor to use one input for monitor display and the other input for signal conversion. The same can be done simultaneously with monitor 2.

The 4RU rack mount design offers various of mounting methods for on-site monitoring, video wall and video production vans. Excellent display with advanced auxiliary functions also provides viewing & friendly user experience.

TLM-102 pairs perfectly with the SE-500HD Video Switcher for multi-view monitoring on the left side and program output monitoring on the right (or vice-versa).
