

# **PTZOptics PT-JOY-G3 Third Generation Visca over IP Joystick Keyboard with PoE**

## **Make way for Generation 3**

Completely re-designed once again, with over three years of customer feedback and optimized functionality.

## **Latency = Eliminated**

This joystick is now driven by the SONY VISCA Over IP Protocol.

You asked and we listened. This joystick is ready for any professional video application with six camera switching hotkeys and access to even the finest camera detail settings over IP.

## **Easy Operation**

We made PTZ camera control easy enough for volunteers and advanced enough for broadcast professionals.

## **Single Cable Simplicity**

The 3rd generation IP Joystick includes PoE (Power Over Ethernet). Take control of cameras all across your network with a single Ethernet cable connection. Simplify your next Joystick setup with a PoE network switch.

Easy pan, tilt & zoom controls for your PTZOptics camera! Controls pan & tilt with variable speeds that now match every option inside PTZOptics cameras. Use 2 & 3-dimensional joystick with "twist" control of focus and zoom!

## **Features**

- Durable Metal Housing
- VISCA over IP protocol
- Auto-Search network
- Real time status display
- Pan, Tilt, Zoom Control
- Pan & Tilt Speed Control
- PoE (802.3af)
