

# PreSonus Studio 68c The versatile ultra-high-def 6x6 USB-C Audio Interface with 4 Mic inputs/24-bit/192kHz

## Professional quality for small and mid-sized studios.

An excellent choice for small bands, producers, and small and mid-sized studios, the Studio 68c 6-in, 6-out, USB-C audio interface records at up to 192 kHz. You get two mic/line/instrument and two mic/line inputs, all with PreSonus® XMAX mic preamps, plus DC-coupled line outputs and MIDI I/O. A complete, all-in-one recording studio, the Studio 68c comes with PreSonus' award-winning Studio One® Artist music production software for macOS® and Windows® and is backward compatible with USB 2.0 and 3.0 connections.

## World-class recording software included.

Seamlessly integrated with the included PreSonus Studio One Artist music production software, the Studio 68c interface works with virtually all macOS and Windows recording software. Easy to learn, Studio One enables you to compose, record, and produce without getting distracted by the tools. Need a new loop or sample for your latest production? Studio One lets you shop, audition, and purchase new content right from your production environment.

## Take the tour.

The 6-in, 6-out Studio 68c audio interface features USB-C computer connectivity and includes 2 combo mic/instrument/line inputs and 2 combo mic/line inputs with +48V phantom power for condenser mics, plus S/PDIF digital I/O. All four ¼-inch TRS, line-level outputs are DC coupled, enabling them to send control voltages. A Cue Mix A/B function lets you toggle between two mixes while monitoring through headphones—perfect for DJs and to listen in on a performer's monitor mix. The Studio 68c's built-in MIDI interface enables connection to a keyboard, sound module, or control surface.

## Superior sound.

The Studio 68c operates at up to 192 kHz for ultra-high-definition recording and mixing. High-quality converters on every input and output and PreSonus' professional-grade XMAX mic preamps deliver incredibly high headroom, deep lows, smooth highs, and a rich overall sound.

## Designed for the studio. Built for the road.

Whether you need a high-quality audio interface for DJing, are a veteran producer, or both, the Studio 68c will give you the ultra-high-def sound and versatile connectivity you need to make state-of-the-art recordings and perform them live. While it's a perfect companion for any recording software, the Studio 68c and included Studio One Artist provide you with a complete, affordable, mobile recording studio.

## Includes Studio Magic Plug-in Suite.

This suite of plug-ins adds a wealth of fresh sounds and effects to Studio One. Cherry-picked from the first names in virtual instruments and effects, each plug-in brings a different flavor of practical magic to your songs. These plug-ins aren't gimmicky one-trick ponies — these are real-deal workhorses that you'll rely on for countless mixes.

## Features

### Input/Output

- Simultaneous I/O up to 6 inputs/6 outputs (4x4 at 192 kHz)
- 2 mic/instrument/line inputs with XMAX Class A mic preamps
- 2 mic/line inputs with XMAX Class A mic preamps
- 2 balanced ¼" TRS main outputs
  - DC coupled for sending control voltages
- 2 balanced ¼" TRS line outputs for monitor mixing
  - DC coupled for sending control voltages
- 1 stereo headphone output
- MIDI In/Out
- Stereo S/PDIF digital I/O

### Meters, Controls, and Features

- Direct monitoring
- Cue mix A/B (for headphone output)
- Front-panel level controls for main outputs
- True +48V phantom power for condenser microphones (global)
- 6 ladder-style LED level meters (4 input, 2 main output)

### Integrated Software

- Studio One Artist®
- Studio Magic Plug-in Suite

### Digital

- USB-C port (USB 2.0)
- 24-bit resolution

- 44.1, 48, 88.2, 96, 176.4 and 192 kHz sampling rates

#### Physical

- Road-rugged construction with all-metal chassis and metal knobs
