

Roland AR-200R Half 1U Rack Space Digital Audio Recorder

The AR-200R Audio Recorder is a 1/2 rack space digital audio recorder/player designed for any application requiring high fidelity pre-recorded announcements. The AR-200R offers extensive control options for playing back and recording audio as well as sophisticated internal playlists. AR-200Rs can also serve as slave units in any multi-channel AR playback or recording system. Its 1/2 rack design provides a small footprint for compact and mobile applications.
