

Roland HT-TX01 1080/60p HDMI/HDBaseT Extender (Transmitter) with RS-232C up to 100m/328ft

HT-TX01 - HDBaseT-compatible transmitter capable of transmitting HDMI signals up to 100 meters over an Ethernet cable.

Roland HD BaseT solutions empower the sharing of ideas in huddle & meeting rooms and supports AV installations with simplified distribution of the presenter's computer to a video switcher or a digital projector hundreds of feet away.

Pair the Roland HT-TX01 Transmitter with the Roland HT-RX01 Receiver to convert and transmit uncompressed High Definition HDMI video, audio and RS-232 control up to 100 meters using industry standard Cat5e cable.

Features:

- Converts HDMI input to HDBaseT signals
- Maximum 1080/60p and WUXGA support for HDMI
- HDCP compliant
- Capable of RS-232C transmission
