

# Roland RT-30K Acoustic Kick Drum Trigger

## PRO PERFORMANCE FOR HYBRID DRUMMING

With exceptional trigger sensitivity, ultra-quick installation, and compatibility with the latest drum hardware, the streamlined RT-30 series sets a new standard for anyone wanting to explore hybrid drumming. Developed specifically for use on bass drum, the RT-30K provides fast and accurate triggering in a robust unit that's simple to install. The newly developed self-guided mount automatically sets the sensor in the optimum position against the drumhead, with no fussy mechanical adjustment needed after mounting.

### Features:

- Advanced trigger device for playing electronic sources from an acoustic bass drum
- Compatible with Roland's TM-2 Trigger Module, TD-series V-Drums sound modules, and SPD-series percussion pads
- Newly developed self-guided mount makes installation quick and easy
- Durable fiberglass-reinforced ABS body and secure mounting mechanism for dependable operation
- Protective grip prevents marring of wood bass drum hoops
- TRS connection cable included
