

Roland S-0808 8x8 Input/Output Unit

The RSS S-0808 is a compact, portable and lightweight digital snake designed for both fixed and flexible applications. It delivers 8in/8out audio with remote controllable preamps, phantom-power, 24-bit 96kHz A/D conversion as well as choices of XLR, TRS line and even Hi-Z capability to reduce the need for direct boxes. The S-0808 supports multiple remote power options including battery-power, embeddedpowered over REAC and power over Ethernet (PoE). Pair two S-0808 together for a complete point-to-point 8x8 snake. The versatility in power and input choices make the S-0808 ideal for location sound, live sound reinforcement, remote broadcasting and other portable applications.

Location Sound

The S-0808 is ideal for location sound recording and sound design with the ability to be battery powered as well as lightweight, rugged construction.

Mobile Broadcast

Connect up to four S-0808 units in various locations around an event or venue. Run a Cat5e cable from each to an S-4000M REAC Merge Unit located in the broadcast truck. The S-4000M provides power to each S-0808 as well as merges all I/O into a single stream. Control the preamps using the S-4000R or remote control software via PC.

Live Sound / Festival /Installed Sound/Church

Use up to four S-0808 in combination with the S-4000M REAC Merge Unit to distribute I/O around a stage. Put an S-0808 on the drum riser, another by keyboards, another with guitars and another with background vocals. Allows flexible stage configurations as well as provides power to each S-0808 stage boxes.
