

Roland TD-50K-S Roland Drum System

When your drum technique is evolving fast and your career is taking flight, it's vital to play a kit that matches your talent and ambition. As part of the new flagship V-Drums series, the TD-50K offers unparalleled expression for top-level performance, demanding practice sessions, and pro studio work. Built on the foundation of the new TD-50 module with Prismatic Sound Modeling, this electronic kit provides Roland's most impressive and wide-ranging sounds yet. The advanced processor is complemented by newly developed snare and ride pads, which feature multi-element sensor systems and high-speed digital communication with the module. Meanwhile, deep customization and open-ended connectivity mean it's never been easier to capture your sound. Delivering exceptional playability and maximum expression, the TD-50K is as serious as you are.

Features:

- Flagship electronic drum kit with ultimate expression
