

Roland TD-50KV-S Roland Drum System

As an ambitious pro drummer, you know that anything less than the ultimate sound and feel will hold you back. Introducing the new Roland TD-50KV—the flagship release in our acclaimed V-Drums range, created for top-flight live performance, intense practice sessions, and eclectic studio work. Built on the foundation of the new TD-50 module with Prismatic Sound Modeling, this electronic kit delivers Roland’s most impressive and wide-ranging sounds yet. The advanced processor is complemented by newly developed snare and ride pads, which feature multi-element sensor systems and high-speed digital communication with the module. The kit also includes top-line tom, crash, and hi-hat pads, and the module provides deep editing features and flexible connectivity to put you in charge. Offering supreme playability and unmatched expression, the TD-50KV is the new pro standard in electronic drums.

Features:

- Flagship electronic kit with ultimate expression
- TD-50 module with Prismatic Sound Modeling and all-new onboard sounds
- Newly developed 14-inch PD-140DS digital snare with a high-resolution multi-sensor system for unparalleled dynamics and accurate positional detection
