

Roland VP-42H 4x2 Multi-Format HDMI Video Processor (Switcher/Matrix/Split)

Everything you need, on a single screen

The Roland VP-42H Video Processor layers and arranges multiple video sources to a single screen with dynamic transitions for effective and engaging presentations, digital signage and meeting applications.

Features:

- Combine up to four HDMI video sources on to a single output
- Simple set-up and remote switching with browser-based network control
- Connect and switch multiple resolutions simultaneously
- Audio management and connection to external audio devices
- Motion Scene Switching for fluid transitions between complex screen sets
- Keyer function for overlays and advanced compositions
