

Adder ALPV154T-US Digital Signage Transmitter

The AdderLink LPV154T delivers HD quality digital signage video via CATx cable over distances of 150 meters. This digital signage extender is possibly the easiest to install point-to-point extender available today. By transmitting the power to the receiver via the cable it removes the need for extra power supplies and sockets at the screen.

Features:

- Used to extend HD video up to 500 feet over CatX cabling
- Full HD 1080p, 1080i & 720p Distances up to 150m (500ft)
- Video sharpness adjustment
- Powered by a USB port on your computer
- On/off control via RS232

Applications:

- Digital Signage
- Multimedia
- POS
- Video Display
