

dARTS 660 In-Wall 6.5 inch Woofers In-Wall Speakers Kit

The 660 In-Wall series brings the power of dARTS Theater to a flush-mount wall design with grilles that can be painted to match the room color. Front speakers (left, center, right) incorporate a 1.125" soft dome tweeter and two 6.5" 3LC woofers; surrounds use two 1" soft dome tweeters and two 6.5" 3LC woofers in an angled baffle. Our in-wall sub has two 10" poly drivers with NBR surround. In-wall systems can provide THX reference level SPL in a room measuring up to 18,000 cubic feet. Ask your dARTS Theater integrator for assistance in determining the proper configuration for your theater. Now available is the DC-660-R, an in-ceiling speaker that integrate into any dARTS Theater system installations and is perfect for Dolby Atmos® theater configurations.
