

# Auratone 5C Mahogany with Amp Super Sound Cube/Passive Monitor/80-15000 Hz/Mahogany (Pair) with A2-30 Amplifier

The Auratone 5C Super Sound Cubes with A2-30 Amp Bundle provides exactly that: two 5C Super Sound Cube loudspeakers and one A2-30 amplifier to power them. The passive 5C loudspeakers are renowned for their unforgiving clarity. Any mix that sounds good on these is said to translate well to other listening systems. As such, they make for suitable reference monitors when trying to gauge mixes in the real world.

The A2-30 amplifier is designed to power these speakers without bells and whistles. You'll only find a power switch, XLR connections, speaker binding posts, and a status LED.

## Features:

- Includes 2 5C Super Sound Cubes
