

SunBriteTV SB-AW-6-BLK All-Weather 6.5 inch Surface Mount Outdoor Speakers (Pair) - Black

These SunBriteTV All-Weather Surface Mount Speakers offer remarkable value and enhanced performance to sound better than the competition, and at a better price. The outdoor speakers feature premium components and a durable exterior, and can be mounted either vertically or horizontally. With a high-temperature polypropylene cone, nomex Spider, and aluminum dome tweeter all inside a rugged, weather-resistant housing, they are perfect for use in wide dispersion distributed audio systems, or in places where a traditional speaker just won't work.

SunBriteTV television owners wanting to take their outdoor sound to the next level will find the 6.5" wall/ceiling mount speakers to be a great solution.

Includes two speakers plus mounting hardware

Blends in Sound

Thanks to premium components - like a polypropylene woofer and aluminum dome tweeter - SunBriteTV All Weather Surface Mount Speakers are optimized for outstanding performance. Perfect for everything from easy listening on a weeknight to a cranking it up for a weekend party.

Designed for Durability

Whether it's extreme heat, excessive moisture, or another environmental hazards, these speakers are more than up to the challenge. A rugged build, UV-treated casing, stainless steel hardware, and weatherproofed adhesives allow for optimal performance in any weather.

Engineered for Versatility

Solid construction eliminates resonance and minimizes vibrations, while a beautiful high-gloss finish compliments any decor.

Lifetime Limited Warranty

Features:

Weather Resistant

A true all-weather product, this speaker features polypropylene woofers for a deep, full sound and aluminum tweeters that produce crisp, clear audio in any climate. Its hardware is ready to live a hard life, thanks to aluminum grills and brackets, a UV-treated, mineral-filled polypropylene cabinet, and stainless steel bolts. This speaker is engineered to withstand the elements.

Quality Components

Designed for optimal audio quality in wide dispersion distributed audio systems, this all-weather speaker features a slew of top-notch components, including a 6.5-in. polypropylene cone with Nomex spider, a high-temperature voice coil, and a 1-in. aluminum dome tweeter. It can operate effectively in even the harshest environments, from bitterly-cold Maine winters to blazing-hot Arizona summers.

Gold-Plated Binding Posts

Tired of working with flimsy spring connectors that don't stand up over time, or struggling with tiny screw-down connections? This all-weather speaker features gold-plated 5-way binding posts that are easy to use and provide secure connections.

Easy mounting with a smarter bracket

Thanks to handy slots on either end, installation is as easy as mount the bracket, loosen the knobs on the speaker, and slide it on. Included rubber gaskets attach to the slots to hold the speaker tight once it's mounted, and ribs along the edge increase stiffness to resist sagging. The speaker itself has industry-standard M6 threaded inserts for mounting versatility.
