

Gefen EXT-RMT-EXTIR 2m/6ft IR Extender

Intended Use(s): Home Theater | Computer A/V | Digital Signage Relocate the IR Eye of Gefen Switchers -- 6 feet away. Relocate your HDTV switcher 6 feet away from the unit's usual built-in Infra-Red Eye with the Gefen IR Extender cable. Create a sleek, custom appearance to your A/V setup by concealing your switcher, extend the IR signal range, or simply add installation flexibility when locating your Gefen equipment -- all at a very reasonable cost. How It Works Simply plug in the IR-Extender mini-photo plug into the port marked "Remote" on your Gefen unit, power cycle your Gefen unit, and then control the Gefen unit by pointing your IR Remote at the new IR eye, which is now located at the end of the 6-foot extension cable instead of the built-in IR eye in the metal box. You can now locate the Gefen chassis anywhere you choose, as long as the extended IR eye is directly visible to your IR Remote across the room. **Note:** This product is powered by your Gefen switcher. No other power source is needed. Features:

- Adds relocation flexibility to compatible Switchers during installation
- Dark colored, tiny IR Eye module hides easily among equipment and furniture
- IR Extender enables a longer range of control than without the Extender
- Soft and flexible black cable fits in narrow spaces unobtrusively
- Rubber mat under Extender head unit insures a non-scratch installation

Specifications:

- Connector: 1/8-inch mini-phono plug
- Weight: 2.1 ounces including cable
- Dimensions: 2" x 1.4" x 0.8" device, 0.1" dia. cable
- Color: Black

Package Includes:

- 6-foot IR Extender cable with integrated IR Eye module (at one end)
