Adder CCUSB PS/2 (+Video) To USB (+ Video) Convertor Cable 6ft (2m)

Connect Sun, Mac, laptop or PC (USB) computers to your KVM switch using these neat, intelligent interface cables, available in different lengths to suit your application.

The USB and Sun interface cables deliver high functionality multi platform KVM connectivity at low cost, and may be used with any PS/2 style KVM switch. Miniature 'keep alive' circuitry is moulded into the cables to ensure problem free computer operation even if the KVM switch is powered off. An intelligent communications system enables the active circuitry within the cables to work in close partnership with ADDER MP Matrix and 108 MP switches to provide enhanced functionality.

FEATURES

Fully moulded robust construction with colour coded connectors

May be used with any quality PS/2 style switches

Intelligent communication ensures a high level of integration with MP switches

Keep aliveâ„¢ circuitry provides increased system reliability

Keyboard country code reporting and DDC support ensures Sun compatibility

Downloadable drivers for different keyboard layouts and future upgrades
