

Atlona AT-HAD-V31 3x1 (1.3b) HDMI Automatic Switch with 6ft Pro-HDMI Pigtail and 3D Support

Atlona 3x1 (1.3b) HDMI Automatic Switch with 6ft Pro-HDMI Pigtail and 3D Support. Model: AT-HAD-V31

Atlona's AT-HAD-V31 is a high performance 3x1 HDMI Switcher. Switcher has an intelligent AUTO function, which would automatically select the newly powered on source. The AT-HAD-V31 is based on the Silicon Image **HDMI 1.3b** chip-set and therefore capable of passing-through the highest resolutions up to **1080p**. Atlona customers have asked that we include an HDMI cable with our switchers. We decided to go the extra mile and permanently attach a 6ft Pro HDMI Cable to this particular switch.

Technical Features:

- **3D Capable**
- Supports HDMI 1.3b
- Supports high resolutions up to 1920x1200 or 1080p
- Support 36-bit Deep Color depth
