

Audio Authority 1154B 4x1 Component Autoselect Switcher with IR Remote

The 1154B is a completely redesigned 4-input, 1-output AutoSelecting switcher with infrared remote control. It switches high definition component video up to 1080p, and audio signals including stereo (analog), digital coaxial, and digital optical audio. The 1154B is a useful companion to any component video-based entertainment system, enabling higher performance video switching than most A/V receivers, and a step up in quality over passive switchers with limited bandwidth.

Key Features

- Discrete selectable inputs
- Connectors grouped by input number for easy hookup
- Supports component video (YPbPr) up to 1080p
- Digital audio (coaxial and optical)
- Automatic digital audio cross-conversion
- Stereo analog audio
- AutoSelect technology with manual selection override
- AutoSelect senses changes in digital and analog audio signals
- Proudly built in our own US factory

Input s /Outputs

- Component video (YPbPr) - 4/1
- Digital audio (coaxial and optical) - 4/1
- Analog stereo audio (L/R) - 4/1
