

## Shinybow SB-5425 4x2 Auto S-Video/Audio Switcher

The SB-5425 is one of the most innovative Video / Audio switching products on the market today. The SB-5425 is an Auto Switcher for Composite Video / Stereo Audio signals. Each has 4 individual AV inputs with 2 identical AV outputs and is useful for routing signals from AV source devices such as VCR's, Camcorders, Game Consoles, Video CD's DVD's, Satellite Receivers, CATV Set-top boxes, etc. to AV destination devices such as VCR's, DVD-R's, TV sets, Video Projectors, etc. This avoids the need for constantly moving cables around. In addition to the innovative Auto Mode, the Auto Switchers can operate in manual mode for switching too.

### Features:

- Automatic Switching of Composite Video and Analog Left & Right Audio between multiple sources and displays.
- Allows connection of 4 sources and 2 destinations (same signal)

### Specifications:

- Video Amplifier Bandwidth: >80MHz
- Video Input Connectors:
  - 4 Composite Video
  - 4 Left & Right Audio
- Video Output Connectors:
  - 2 Composite Video
  - 2 Left & Right Audio
- Power Consumption: 300mA
- Power Supply: 12VDC; 300mA
- Switcher Size: (WxDxH) 7.8 x 5.1 x 1.5 inches

### In the box:

- SB-5425 Routing Switcher
- Users Guide
- AC/DC Adapter: 12VDC, 300mA
- NO REMOTE CONTROL
