

Blonder Tongue TL-PI-1000 Outdoor Power Inserter TLS Series 5-1000MHz

Separate gaskets are used to provide weatherproofing and RFI integrity. DMT housings are made with 360 aluminum alloy with a polyurethane coating to ensure maximum corrosion resistance. The TLS Series of trunk line splitters are available in 2 and 3 way versions as well as single port directional coupler models with values of 8, 12 and 16 dB. A power inserter model rounds out the series. All TLS Series housings have 5/8-24 entry fittings on all ports and are made with the same corrosion resistant materials as the DMT Series.

FEATURES AND BENEFITS

- 1 GHz Bandwidth
- RFI Shielding and Weather-Sealing Gaskets
- 360 Aluminum Alloy Housing and Stainless Steel Hardware ForCorrosion Resistance
- TLS Series have 5/8" Entry fittings and are available in 2 and 3Way Splitters and 8,12 and 16 dB Directional Coupler
