

Shinybow SB-5477 4x2 Component Video / Digital Audio / Stereo Audio Mat

Ideal for Plasma Display Panels, DLP and LCD Projectors and other Professional displays devices. The HD-5477 can be used to add multiple A/V sources to any system. The high bandwidth circuitry accepts HDTV (YPbPr) component video, stereo analog audio, and digital audio in coaxial formats. HDB-5477 accepts up to four different input sources and you can seamlessly switch (select) any of these inputs to drive either of the 2 outputs or both. It is universally compatible with all HDTV formats: 480i, 576i, 480p, 576p, 1080i, 720p and 1080p. The HD-5477 can be controlled by its front-panel manual control button, or IR remote. The convenient front-panel LED indicates which input has been selected for both outputs.

- 4 Inputs Component/Digital Audio (Coax) /Stereo Audio (RCA)
- 2 Outputs Component/Digital Audio (Coax) /Stereo Audio (RCA)
- Matrix Function with IR and Manual via front panel
- For HDTV 480P, 576P,720P,1080i (1125i)
- Video Bandwidth 700Mhz
- Video Distortion < 1.2db
- Audio Distortion < 0.6db
- Channel Isolation > 50db
- S/N Ratio > 50db
- Use IR Remote Controller (Frequency 38KHz).
- Optional 19in EIA Rack Mount (must be added before product ships)
- Optional Rack Ears (field Installable)
- Lower Power Consumed 12VDC,@500mA.
