

# Blonder Tongue ZTA-15 Broadband VHF/FM/UHF Distribution Amplifier

The ZTA Series are distribution amplifiers, designed for off-air applications in MATV, SMATV, and Wireless Cable systems. These very affordable split band amplifiers provide high output capability with low noise contribution. Four gain models are available for VHF, FM, and UHF signal reception to fit most systems.

## FEATURES AND BENEFITS

- VHF/FM/UHF Distribution Amplifiers
- Models Available with Gains of 15, 25, 35 and 45 dB
- Wide Dynamic Range
- High Output Capability
- Low Noise Figure
